

VIDEOMANAGER

DEVICE AND VIDEO MANAGEMENT MADE EASY

Managing a body-worn video program doesn't have to be hard. VideoManager provides the flexibility you need to easily administer cameras and efficiently store, prepare and share recorded footage - no matter the size of your deployment or how sophisticated you want, or need, your program to be.

ALIGN YOUR SYSTEM TO YOUR NEEDS

VideoManager's flexibility and scalability encompasses both initial deployment and everyday use - so there's always a solution which is right for your organization.

OPTIMIZE CAMERAS FOR EVERY USER

Adapt your Motorola Solutions body-worn cameras to your team's needs with VideoManager's granular configuration options.

FROM CAPTURE TO CLOSURE, ALL IN ONE

VideoManager covers every step of a video's journey - spanning ingest, organization, sharing and deletion - in one user interface so content is available when needed.

AUTOMATE AWAY THE INEFFICIENCIES

With more devices and videos in one place than ever before, we've built-in advanced automation and integration to keep workloads manageable and data processing efficient.

KEEP YOUR DATA SAFE & COMPLIANT

Cutting-edge security protocols restrict who can access your system and what they can do on it, while also protecting your videos with encryption.

ALIGN YOUR SYSTEM TO YOUR NEEDS

ROLES, GROUPS & PERMISSIONS Enable granular permissions for individual users and groups to control all possible actions on the system.

UI COLOR SCHEMES & LOGOS Use CSS, HTML or HEX codes to change VideoManager's UI colors. Import your logo for display on the log-in and navigational pages.

STANDARD & CUSTOM LANGUAGE PACKS Import a custom language pack into VideoManager so terminology is uniform across your organization.

COMPATIBLE SERVER PLATFORMS

- Windows 10 Pro & Enterprise 64-bit
- Windows 11 Pro & Enterprise
- Windows Server 2012 Essentials, Standard & Datacenter*
- Windows Server 2012 R2 Essentials, Standard & Datacenter*
- Windows Server 2016 Essentials, Standard & Datacenter*
- Windows Server 2019 Essentials, Standard & Datacenter*
- Windows Server 2022 Essentials, Standard & Datacenter*

COMPATIBLE CLIENT BROWSERS

- Microsoft Edge 79+ (Windows 10/11)
- Firefox 68+ (Windows 10/11)
- Chrome 48+ (Windows 7/8.1/10/11, MAC OS X v10.10)

OPTIMIZE CAMERAS FOR EVERY USER

DEVICE PROFILES Configure aspects of camera behavior. Options include LEDs, haptic feedback, pre-record and button gestures.

GPS MAPPING Integrate with Google Maps™, OpenStreetMap™ and ESRI™ ArcGIS to view and add location information post-recording.

RAPID DEVICE ASSIGNMENT Associate cameras with users for a complete evidential trail.

METADATA OVERLAYS Customize the information presented on camera footage. Options include date, time, operator and GPS track.

VMS INTEGRATION Pass camera live streams to a third-party VMS, such as Avigilon Unity Video™.

* USB attached devices are not supported on Windows Server 2016 and later.

FROM CAPTURE TO CLOSURE, ALL IN ONE

Import media from external sources.

Supported file extensions:

- MP4/MOV - .mp4 .mov .m4a .m4v
- JPEG - .jpg .jpeg
- BMP - .bmp
- MP3 - .mp3
- AVI - .avi .av
- MPEG-PS - .mpg .mpeg .vob
- MPEG-TS - .mts .ts
- PNG - .png
- WMA (ASF) - .wma .asf
- WAV - .wav

IMPORT

TAGGING

Categorize VB400 footage while still in the field, via the VB SmartControl iOS/Android app.

REDACTION

Hide sensitive information with blurring, pixelation and audio muting.

TRANSCRIPTION

Upload or edit transcripts which play simultaneously alongside videos.

INCIDENTS

Manually or automatically collate media in one location for ease of sharing.

SHARING

Share media and incidents internally (via permissions) or externally (via time-sensitive links or exports).

AUTOMATE AWAY THE INEFFICIENCIES

BULK EDIT

Upgrade multiple body-worn cameras, edit multiple incidents, or categorize multiple videos simultaneously.

LIVE STATISTICS AND REPORTS

Get easy-to-digest information about a variety of high-level system parameters at a glance.

ARCHITECTURE

Create a hierarchical structure with multiple VideoManager instances to ensure visibility over your entire system.

SYSTEM CONFIG IMPORT/EXPORT

Export your unique VideoManager configuration to one XML file, and import it into another instance of VideoManager.

USER IMPORT & SELF-SERVICE ACCOUNT CREATION

Sync databases across your organization, and empower your employees to create their own user profiles.

KEEP YOUR DATA SAFE & COMPLIANT

AUTHENTICATION

Configure two-factor authentication with SMS codes or email links.

Use existing OAuth2 credentials for a smoother sign-in process.

ENCRYPTION

All media is encrypted - both in filespace, and upon export. Body-worn footage is protected with system-specific access control keys.

VERIFICATION

Body-worn footage can be verified with X.509 footage signing.

AUDIT LOG

View a comprehensive, non-editable trail of all actions taken on the system.

RETENTION & DELETION

Configure deletion policies based on video properties such as bookmarks, recording date, and incident status.
